

PHASE I ENVIRONMENTAL SITE ASSESSMENT CORRIDOR STUDY

PARK TO PLAYA TRAIL SEGMENT C CULVER CITY, CALIFORNIA

PREPARED FOR:

MOUNTAIN RECREATION AND CONSERVATION AUTHORITY
LOS ANGELES RIVER CENTER & GARDENS
570 W. AVENUE 26, SUITE 100
LOS ANGELES, CA 90065

PREPARED BY:

GEOCON WEST, INC.
3303 N. SAN FERNANDO BOULEVARD, SUITE 100
BURBANK, CA 91504-2531

GEOCON PROJECT NO. A9240-77-01

SEPTEMBER 2015

Project No. A9240-77-01
September 22, 2015

Ms. Ana Straabe
Deputy Chief of Urban Projects & Watershed Planning Division
Mountain Recreation and Conservation Authority
Los Angeles River Center & Gardens
570 W. Avenue 26, Suite 100
Los Angeles, California 90065

Attention: Mr. Dylan Hinkle

Subject: PHASE I ENVIRONMENTAL SITE ASSESSMENT CORRIDOR STUDY
PARK TO PLAYA TRAIL SEGMENT C
CULVER CITY, CALIFORNIA

Dear Ms. Straabe:

In accordance with your request and the signed Professional Services Agreement between Geocon and Bonterra-Psomas dated March 4, 2015, we have performed a Phase I Environmental Site Assessment (ESA) corridor study for the above-referenced proposed trail (the Site). We performed the Phase I ESA to provide information regarding the potential for existing hazardous substance or petroleum product impacts at the Site prior to its acquisition by Mountains Recreation and Conservation Authority (MRCA), the Client.

We appreciate the opportunity to have performed this Phase I ESA for MRCA. Please contact us if you have any questions concerning this report or if we may be of further service.

Very truly yours,

GEOCON WEST, INC.

Scott M. Nunes, CAC
Senior Environmental Scientist

Jim Brake, PG
Senior Geologist/Vice President

(EMAIL) Addressee

PHASE I ENVIRONMENTAL SITE ASSESSMENT

1. INTRODUCTION

This report presents the results of a Phase I Environmental Site Assessment (ESA) corridor study for an alignment for an approximate one mile long proposed walking trail planned to extend from La Cienega Boulevard on the east to the parking lot for the Baldwin Hills Scenic overlook to the west (the Site) in Culver City, California. The Site currently consists of an active oil field on the eastern portion that is operated by Freeport McMoRan Oil and Gas (FMOG) and vacant land on the western portion. The Site is owned by the Baldwin Hills Regional Conservation Authority (BHRCA), with FMOG only having mineral rights and leasing the land south of the BHRCA parcels. The Phase I ESA was requested by Mountain Recreation Conservation Authority (the Client) to provide information regarding the potential for existing hazardous substances or petroleum product impacts at the Site as part of the environmental review process for a proposed trail through the Site.

1.1 Purpose and Objectives

The purpose of the Phase I ESA was to identify evidence or indications of ‘recognized environmental conditions’ (REC) as defined by the American Society for Testing and Materials (ASTM) *Designation E 1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. Section 1.1.1 of ASTM Designation E 1527-13 defines an REC as “the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.” De minimis conditions are those that generally do not present a threat to human health or the environment and that generally would not be the subject of the enforcement action if brought to the attention of appropriate governmental agencies.

ASTM *Designation E 1527-13* also defines ‘Historical’ and ‘Controlled’ RECs. An ‘Historical REC’ is defined as “A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).” A ‘Controlled REC’ is defined as “a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).” An HREC is not a REC if the release meets current standards for unrestricted residential use. A CREC remains a REC by definition because it does not meet the unrestricted residential use requirement unconditionally.

The Phase I ESA was also conducted in general accordance with the requirements of 40 Code of Federal Regulations (CFR) Part 312 titled *Standards and Practices for All Appropriate Inquiries*, as required under Sections 101(35)(B)(ii) and (iii) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The purpose of conducting an all appropriate inquiries investigation into the previous ownership and uses of a property is to meet the provisions necessary for the landowner, contiguous property owner, and/or bona fide prospective purchaser to qualify for certain landowner liability protections under CERCLA.

The following principles are an integral part of ASTM Designation E1527-13:

- ***“Uncertainty Not Eliminated*** - No environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with a property, and this practice recognizes reasonable limits of time and cost.”
- ***“Not Exhaustive*** - All Appropriate Inquiries does not mean an exhaustive assessment of a property. There is a point at which the cost of information obtained or the time required to gather it outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of transactions. One of the purposes of this practice is to identify a balance between the competing goals of limiting the costs and time demands inherent in performing an environmental site assessment and the reduction of uncertainty about unknown conditions resulting from additional information.”
- ***“Level of Inquiry is Variable*** – Not every property will warrant the same level of assessment. Consistent with good commercial and customary practice, the appropriate level of environmental site assessment will be guided by the type of property subject to assessment, the expertise and risk tolerance of the user, and the information developed in the course of the inquiry.”

1.2 Scope of Services

The signed Professional Services Agreement between Geocon and Bonterra-Psomas dated March 4, 2015, describes the scope of services for this Phase I ESA. The scope of services outlined in the proposal was performed with the exception that Sanborn Maps were not reviewed. Environmental Data Resources, Inc. (EDR) stated that Sanborn Map coverage does not exist for the Site.

The main components of this report and their objectives, as specified by the referenced standards, include the following:

- **Physical Setting:** we reviewed physical setting references to obtain information concerning the topographic, geologic, and hydrogeologic characteristics of the Site and vicinity. Such information may be indicative of the direction and/or extent that a contaminant could migrate in the event of a spill or release.
- **Regulatory Agency Records Review:** we reviewed regulatory agency records to obtain information that could potentially help identify RECs at or potentially affecting the Site. We reviewed publicly available Federal, State, and local regulatory agency records for the Site.

- **Site History:** we reviewed historical references to assess the previous uses of the Site and surrounding area to identify those that could have led to RECs on or near the Site. Historical sources reviewed included aerial photographs, topographic maps, and city directories. In addition, we conducted interviews with persons who were expected to be reasonably knowledgeable about historical and/or current conditions at and uses of the Site.
- **Site Reconnaissance:** we performed a site reconnaissance to observe site conditions and activities for indications of evidence of RECs. The site reconnaissance was for the Site only. Offsite properties and features were viewed solely from the vantage of the Site and public thoroughfares.

1.3 Report Limitations

We prepared this Phase I ESA corridor study report exclusively for the Client. The information obtained is only relevant for the dates of the records reviewed or as of the date of the latest site visit. Therefore, the information contained herein is only valid as of the date of the report and will require an update to reflect recent records/site visits.

The Client should recognize that this report is not a comprehensive site characterization and should not be construed as such. The findings and conclusions presented in this report are predicated on the site reconnaissance, a review of the specified regulatory records, and a review of the historical usage of the Site, as presented in this report. The Client should also understand that wetlands, lead in drinking water, radon, mercury related to mining activities, and methane surveys were not included in the scope of services for this Phase I ESA. Assessment for potential naturally occurring hazards such as asbestos and arsenic was also not included.

Therefore, the report should only be deemed conclusive with respect to the information obtained. No guarantee or warranty of the results of the Phase I ESA is implied within the intent of this report or any subsequent reports, correspondence or consultation, either express or implied. We strived to conduct the services summarized herein in accordance with the local standard of care in the geographic region at the time the services were rendered.

1.4 Data Gaps

A data gap is defined by ASTM Designation E 1527-13 as “a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information.” Data gaps could include such things as insufficient historical information, the inability to interview persons with direct site knowledge (e.g., the owner(s), past owner(s), tenants, workers, etc.) or the lack of access to all parts of a site during the site reconnaissance. No significant data gaps were identified during the performance of this Phase I ESA.

2. SITE DESCRIPTION

This section provides information regarding the location and physical characteristics of the Site including its size, topography, geologic, soil, and hydrogeologic conditions.

2.1 Location and Legal Description

The Site is the alignment of an approximate 1-mile long proposed walking trail that is planned to extend from La Cienega Boulevard on the east to the parking lot for the Baldwin Hills Scenic overlook to the west (the Site) in Culver City, California (Figure 1). The Site is further identified by the following County of Los Angeles legal descriptions:

- For the western portion owned by BHRCA: the real property situated in the City of Culver City, County of Los Angeles, State of California, described as Parcel 1 of Parcel Map No. 24072, as per map filed in Book 286, Pages 13 and 14 of Parcel Maps, in the office of the County Recorder of said county.
- For the eastern portion owned by FMOG: that portion of Parcel 1 of Parcel Map No. 24072, as per map filed in Book 286, Pages 13 and 14 of Parcel Maps, Records of Los Angeles County, described as follows:

Beginning at a point on the generally northerly line of said Parcel 1 shown as having a bearing and distance of North 86 degrees 17 minutes 21 seconds East 287.03 feet, distant thereon North 86 degrees 17 minutes 21 seconds East 29.61 feet from the westerly terminus thereof, said point being the POINT OF BEGINNING; thence South 03 degrees 42 minutes 39 seconds East 200.60 feet; thence South 86 degrees 17 minutes 21 seconds West 288.41 feet to the generally northerly line of said Parcel 1; thence along said generally northerly line the following five courses:

1. North 43 degrees 36 minutes 16 seconds East 54.96 feet.
2. North 24 degrees 36 minutes 49 seconds East 187.46 feet.
3. North 83 degrees 00 minutes 27 seconds East 30.10 feet.
4. North 88 degrees 15 minutes 04 seconds East 99.47 feet
5. North 86 degrees 17 minutes 21 seconds East 29.61 feet to the POINT OF BEGINNING.

The Site is depicted on the United States Geological Survey's (USGS) *Beverly Hills and Hollywood, California, 7.5-minute Topographic Maps* (USGS, 1999 and 1994, respectively).

2.2 Site and Vicinity General Characteristics

The Site consists of an active oil field on the eastern portion that is operated by FMOG and vacant land on the western portion. The entire Site is owned by BHRCA, with FMOG only having mineral rights. FMOG leases the land south of the BHRCA parcels. Residential development is generally located to the north, Baldwin Hills Scenic Overlook and commercial development to the west, remainder of the Inglewood FMOG oil field to the south, and Kenneth Hahn State Recreation Area to the east. Figure 2 is a Site Plan depicting the approximate site boundaries, features and surrounding properties.

2.2.1 Topography

Topography of the Site gently slopes towards the southwest. According to the United States Geological Survey's (USGS) *Beverly Hills and Hollywood, California, 7.5-minute Topographic Maps* (USGS, 1999 and 1994, respectively), the average elevation at the Site is approximately 310 feet above mean sea level.

2.2.2 Geologic Conditions

The Site is located within the Baldwin Hills, a series of northwest trending hills located along the Newport-Inglewood Uplift. Bedrock that underlies the Site consists of siltstone, sandstone, and a conglomerate of Pleistocene and Pliocene age. The soils and colluvium underlying the Site are comprised mainly of sandy clay, clayey silt, clayey sand, silty sand, and silt. The Baldwin Hills form a barrier to groundwater flow and are considered non-water bearing.

According to the U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS), which leads the National Cooperative Soil Survey (NCSS), soil at the Site is generally sandy loam and gravelly-sandy loam.

2.2.3 Hydrologic and Hydrogeologic Conditions

In an effort to assess local groundwater conditions, we reviewed reports available on the California State Water Resources Control Board (SWRCB) GeoTracker website (<http://geotracker.waterboards.ca.gov/>) for nearby facilities with a groundwater monitoring well array. One facility with groundwater information was located approximately one mile north of the Site. According to groundwater monitoring well readings from October 2011 at this facility, depth to groundwater was measured at approximately 15-23 feet (the site elevation at this facility is at approximately 100 feet above mean sea level, compared to approximately 310 feet at the Site). We also reviewed the Water Data Library for the California Department of Water Resources (<http://www.water.ca.gov/waterdatalibrary/>) to find water data for wells within the site vicinity. No wells were located within approximately one mile of the Site. Groundwater flow direction at the Site is anticipated to be towards the northwest.

It is not uncommon for seepage conditions to develop where none previously existed due to the permeability characteristics of the geologic units encountered. Based on our experience in the vicinity of the Site, it is common for seepage of infiltrated surface water to occur at soil type boundaries. During the rainy season, localized perched water conditions may develop at the ground surface and above cemented or clayey soil that may require special consideration during grading operations. Groundwater elevations are dependent on seasonal precipitation, irrigation, and land use, among other factors, and vary as a result.

2.3 Current and Planned Uses of the Site

The Site extends through an active oil field on the east and vacant land on the west. The planned use of the Site is for a public walking trail. A detailed description of the current use and conditions observed at the Site is in Section 6.0.

2.4 Descriptions of Structures, Roads, Other Improvements on the Site

An unimproved dirt road parallels the proposed trail in the oil field portion of the Site. A dirt trail is located along the proposed trail on the western portion. Further description of Site is presented in Section 6.0.

2.5 Current Uses of Adjoining Properties

Adjoining properties consist of single-family residential development to the north, Kenneth Hahn State Recreation Area to the east, an active oil field to the south, and Baldwin Hills Scenic Overlook to the west. Further information is provided in Section 6.4.

3. USER-PROVIDED INFORMATION

This section provides responses to inquiries made to the Client for site information. The Client was asked via a questionnaire if they are aware of previous environmental reports or documents that may exist for the Site and if so, whether copies could be provided. They were also asked if they have knowledge of legal or administrative proceedings involving the Site. The user questionnaire was completed by Ms. Ana Straabe, a Client representative (Appendix A).

3.1 Title, Appraisal and Sale Agreement Records

The Client representative provided us with a title report for our review. No environmental concerns were noted.

3.2 Environmental Liens or Activity and Use Limitations

The Client representative stated that she had no knowledge of environmental liens or activity and use limitations.

3.3 Specialized Knowledge

The Client representative has no specialized knowledge of the Site.

3.4 Commonly Known or Reasonably Ascertainable Information

The Client representative stated that she has no commonly known or reasonably ascertainable information about the Site.

3.5 Owner, Property Manager, and Occupant Information

The Site (surface estate) is owned by the BHRCA. Pertinent information from the interview and site owner questionnaire is presented in Section 7.0.

3.6 Valuation Reduction for Environmental Issues

According to the Client representative, the monetary value of the Site has not been reduced due to environmental issues associated with the Site or adjacent properties.

3.7 Reason for Performing Phase I

The Phase I ESA was requested by the Client to obtain information regarding the potential for existing hazardous substances/petroleum products at the Site as part of the environmental review process.

4. RECORDS REVIEW

This section summarizes our review of readily available agency records for the Site and properties in the surrounding vicinity.

4.1 Standard Environmental Record Sources

Environmental Data Resources, Inc. (EDR) performed a search of federal, state, and local databases for the Site and surrounding area. The search distance for the review extended one mile from the site boundaries. A copy of the report entitled *The EDR Radius MapTM Report with GeoCheck*, dated March 25, 2015, is in Appendix B.

4.1.1 The Site

The Site is not listed on any of the databases searched by EDR.

4.1.2 Offsite Properties

There are four facilities within 1/8 mile of the Site that are listed in the EDR report. There are no facilities located approximately 1/8 mile to 1/4 mile from the Site in the databases searched by EDR. The information in the EDR report with respect to those facilities does not suggest that activities associated with them are likely to have negatively impacted the environmental condition of the Site due to the status of the facilities, types of listings, distance from the Site, and/or direction with respect to the direction of groundwater flow.

4.1.3 Orphan Summary

The Orphan Summary in the EDR report identifies properties that have incomplete address information and therefore cannot be accurately plotted. The Orphan Summary lists three properties. Based on information provided for the listed properties, their locations, and the databases on which the properties were listed, no significant adverse impact to the Site is expected from these properties.

4.2 Vapor Encroachment Screening

EDR performed a vapor encroachment screening which identifies properties (if any) within a designated area of concern (AOC) surrounding the Site that may be a source of contaminants that could migrate as vapors onto the Site. The AOC for volatile petroleum hydrocarbons chemicals of concern (COCs) is 1/10 mile upgradient of the Site, and the AOC for volatile non-petroleum hydrocarbons COCs is 1/3 mile upgradient of the Site. *The EDR Vapor Encroachment Screen Report*, dated March 25, 2015, (Appendix C), identifies no properties within the AOC for the Site having releases of either volatile non-petroleum hydrocarbon COCs or volatile petroleum hydrocarbon COCs, and therefore, a VEC does not exist for the Site.

4.3 Additional Environmental Record Sources

We performed a search of additional readily available environmental record sources. The search distance for the review extended approximately one mile from the Site. A summary of our findings is presented in the following subsections.

4.3.1 GeoTracker and EnviroStor Websites

We reviewed information concerning permitted facilities, environmental investigations, and remediation projects regulated by the California Regional Water Quality Control Board (RWQCB) and the California Department of Toxic Substances Control (DTSC) available on the State Water Resources Control Board's (SWRCB) GeoTracker website database and the DTSC's EnviroStor website database. No facilities located onsite or within approximately ¼ mile of the Site were identified in the databases.

4.3.2 State of California Department of Conservation, Division of Oil, Gas and Geothermal Resources (DOGGR)

We reviewed the State of California Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR) online mapping system for information regarding the location and status of any oil or natural gas exploration or production at or in the vicinity of the Site. The DOGGR online mapping system shows numerous oil or gas wells on or within one-mile of the Site, mainly to the south (DOGGR, 2015). Eight plugged oil and gas production wells (approximate locations are shown on Figure 1) are located in close proximity along the proposed trail and would be considered an environmental concern to the Site.

5. HISTORICAL USE

This section summarizes information obtained from a variety of sources regarding the historical uses of the Site and identifies historical uses that could have led to RECs. The sources of information included Sanborn fire insurance maps, historical aerial photographs, historical topographic maps, and an abstract of city directories provided by EDR.

5.1 Sanborn, Inc. Fire Insurance Maps

According to EDR’s Sanborn Map Report dated March 25, 2015, Sanborn maps do not exist for the Site or site vicinity.

5.2 Aerial Photographs

Historical aerial photographs for the years 1923, 1928, 1938, 1948, 1952, 1964, 1972, 1979, 1983, 1989, 1994, 2002, 2005, 2009, 2010, and 2012 provided by EDR (Appendix D), were reviewed for indications of past land uses that had the potential to have impacted the Site through the use, storage or disposal of hazardous substances. The following table summarizes the observations of the Site and adjacent properties on the aerial photographs.

Year	Observations	
	Site	Adjacent Properties
1923 (1" = 500')	The Site was vacant land.	Adjacent properties were vacant land, with the exception of an improved road (La Cienega Boulevard) to the east.
1928 (1" = 500')	No significant changes were noted from the previous 1923 aerial photograph, with the exception the Site appears to have been part of an oil field, with a dirt road extending along the approximate length of the Site.	There were various oil wells located adjacent to the Site (part of an oil field located to the south).
1938 (1" = 500')	No significant changes were noted from the previous 1928 aerial photograph.	No significant changes were noted from the previous 1928 aerial photograph.
1948 (1" = 500')	No significant changes were noted from the previous 1938 aerial photograph.	No significant changes were noted from the previous 1938 aerial photograph.
1952 (1" = 500')	No significant changes were noted from the previous 1948 aerial photograph.	No significant changes were noted from the previous 1948 aerial photograph.
1964 (1" = 500')	No significant changes were noted from the previous 1952 aerial photograph.	Single-family residences were adjacent to the north, just west of La Cienega Boulevard. A school site was adjacent to the north of the central portion of the Site. No other significant changes were observed.

Year	Observations	
	Site	Adjacent Properties
1972 (1" = 500')	No significant changes were noted from the previous 1964 aerial photograph.	No significant changes were noted from the previous 1964 aerial photograph, with the exception a park now appeared across La Cienega Boulevard to the east.
1979 (1" = 500')	No significant changes were noted from the previous 1972 aerial photograph.	No significant changes were noted from the previous 1972 aerial photograph.
1983 (1" = 500')	No significant changes were noted from the previous 1979 aerial photograph.	No significant changes were noted from the previous 1979 aerial photograph.
1989 (1" = 500')	No significant changes were noted from the previous 1983 aerial photograph.	No significant changes were noted from the previous 1983 aerial photograph.
1994 (1" = 500')	No significant changes were noted from the previous 1989 aerial photograph.	No significant changes were noted from the previous 1989 aerial photograph.
2002 (1" = 500')	No significant changes were noted from the previous 1994 aerial photograph.	No significant changes were noted from the previous 1994 aerial photograph, with the exception of a long concrete structure was adjacent to the north of the western portion of the Site.
2005 (1" = 500')	No significant changes were noted from the previous 2002 aerial photograph.	No significant changes were noted from the previous 2002 aerial photograph.
2009 (1" = 500')	No significant changes were noted from the previous 2005 aerial photograph.	No significant changes were noted from the previous 2005 aerial photograph.
2010 (1" = 500')	No significant changes were noted from the previous 2009 aerial photograph.	No significant changes were noted from the previous 2009 aerial photograph.
2012 (1" = 500')	No significant changes were noted from the previous 2010 aerial photograph.	No significant changes were noted from the previous 2010 aerial photograph.

The Site has been part of an oil field since at least 1928. This represents an environmental concern for the Site.

5.3 Topographic Maps

Historical topographic maps for the years 1896, 1900, 1901, 1902, 1920, 1926, 1950, 1953, 1966, 1972, 1981, 1994, and 1995 provided by EDR were reviewed. A copy of EDR's report entitled *EDR Historical Topographic Map Report* is in Appendix E. The following summarizes observations of the Site and adjacent properties on the historical topographic maps.

Year	Observations	
	Site	Adjacent Properties
1896 (1:62,500)	No structures or land use are depicted on the Site.	No structures or land use are depicted on adjacent properties.
1900 (1:62,500)	No structures or land use are depicted on the Site.	No structures or land use are depicted on adjacent properties.
1901 (1:250,000)	No structures or land use are depicted on the Site.	No structures or land use are depicted on adjacent properties.
1902 (1:62,500)	No structures or land use are depicted on the Site.	No structures or land use are depicted on adjacent properties.
1920 (1:62,500)	No structures or land use are depicted on the Site.	No structures or land use are depicted on adjacent properties.
1926 (1:24,000)	No structures or land use are depicted on the Site.	No structures or land use are depicted on adjacent properties.
1950 (1:24,000)	The Site is depicted as being part of an oil field.	Adjacent properties are depicted as an oil field to the south. No land use was depicted to the west, east, or north.
1953 (1:24,000)	Similar to conditions depicted on the 1950 topographic map.	Similar to conditions depicted on the 1950 topographic map.
1966 (1:24,000)	Similar to conditions depicted on the 1953 topographic map.	Similar to conditions depicted on the 1953 topographic map, with the exception of Linda Vista School located adjacent to the north.
1972 (1:24,000)	Similar to conditions depicted on the 1966 topographic map.	Similar to conditions depicted on the 1966 topographic map.
1981 (1:24,000)	Similar to conditions depicted on the 1972 topographic map.	Similar to conditions depicted on the 1972 topographic map.
1994 (1:24,000)	Similar to conditions depicted on the 1981 topographic map.	Similar to conditions depicted on the 1981 topographic map, with the exception of Kenneth Hahn State Recreation Area to the east across La Cienega Boulevard.
1995 (1:24,000)	Similar to conditions depicted on the 1994 topographic map.	Similar to conditions depicted on the 1994 topographic map.

No direct evidence of RECs was observed on the Site on the topographic maps. However, the depicted land use of an oil field on the Site and adjacent properties to the south represents an environmental concern.

5.4 City Directory

EDR prepared an abstract of city directories including city, cross-reference, and telephone directories. City directories list business names for properties which may suggest the use, storage, or disposal of hazardous substances or petroleum. The directories were reviewed at approximately five-year intervals, if available, from 1920 to 2013. A copy of the EDR city directory abstract dated March 25, 2015, is included with information regarding offsite facilities in Appendix F.

The Site is not listed in the directories. Mostly residential and some commercial properties north of the Site were listed.

6. SITE RECONNAISSANCE

This section summarizes observations of the Site and surrounding properties made during the site reconnaissance.

6.1 Methodology and Limiting Conditions

Mr. Scott Nunes with Geocon performed the site reconnaissance on April 16, 2015, by walking the Site. Mr. Nunes performed the offsite survey by making observations of adjacent properties from the Site and adjacent roads. Weather on the day of the site reconnaissance was sunny to partly cloudy with temperatures in the low-80s. Access was limited on the central portion of the Site due to topography and vegetation and fencing. In addition, the proposed trail on the Site was not clearly marked or delineated. Photographs of various site features and offsite properties are appended. Figure 2 illustrates selected site features.

6.2 General Site Setting

The immediate site vicinity generally consists of residential development to the north, an active oil field to the south, Baldwin Hills Scenic Overlook to the west, and Kenneth Hahn State Recreation Area to the east.

6.3 Onsite Survey

The eastern portion of the Site (the proposed alignment of the trail) currently parallels a dirt road that extends through the northern end of an active oil field. The central portion of the Site extends north up a hill through native vegetation, then west through a topographic basin along an existing dirt trail. The Site then extends uphill along a dirt path and terminates at a parking lot for the Baldwin Hills Scenic Overlook. The oil field area of the eastern portion of the Site was accessed (by special permission and an appointment) from the Stocker Gate to the south. The western portion of the Site was accessed by walking down the dirt trail from the Baldwin Hills Scenic Overlook parking lot.

An aboveground water pipeline was observed along the northern side of the Site through the oil field. At the point where the central portion of the Site extends north up the hill, a Chevron petroleum pipeline traverses the dirt road adjacent to the Site (as evidenced by a warning sign). A concrete structure adjacent to the north of Site appears to be a barrier preventing runoff to the residences north of the Site. At the southern end of the structure is what appears to be a concrete drainage channel to the east (a metal storm drain is located at this location as well). On the eastern end of the Site (in the oil field section near La Cienega Boulevard), a storm drain/riprap structure is located in the approximate vicinity of where the pedestrian bridge (that will cross over La Cienega Boulevard from Kenneth Hahn State Recreation Area) will connect to the Site.

We did not observe evidence of any aboveground or underground storage tanks or containers, or evidence of other underground utilities or structures at the Site. No pits, ponds, lagoons, or pools of liquid were observed onsite. No surface staining, odors, or stressed vegetation were observed onsite. No evidence of hazardous materials, hazardous waste, petroleum products or dumping was observed onsite.

6.4 Offsite Survey

Properties within the site vicinity include residential development, commercial development, a park, and an oil field. Adjacent properties include:

- **East** – La Cienega Boulevard, beyond which is Kenneth Hahn State Recreation Area.
- **North** – Single-family residences and a vacant parcel (former school site).
- **West** – Baldwin Hills Scenic Overlook and associated parking lot.
- **South** – Active FMOG oil field.

7. INTERVIEWS

We interviewed representatives for the owners of the Site, Ms. Ana Straabe of MRCA, the project manager from Los Angeles County for the future regional trail, and Ms. Candace Salway, a representative from FMOG, the subsurface lessee of the oil field which encompasses the eastern portion of the Site), via a questionnaire (Appendix A).

Ms. Straabe and Ms. Salway indicated oil drilling has historically occurred on-site since 1924 (the entire oil field) and directly adjacent to it. They indicated oil drilling activities are located to the south and a former school (currently a vacant lot being converted to a natural park) is located to the north. Ms. Straabe and Ms. Salway indicated a permitted RWQCB stormwater discharge point is located on-site in the oil field. They also indicated former and current oil and gas wells, and active production injection fresh water lines are located near the Site and on adjacent properties. They also indicated in-field pipelines to transport petroleum products (aboveground and underground) and a Chevron gasoline pipeline are located within the oil field, but do not appear to traverse the alignment for the proposed walking trail.

To the best of their knowledge, no hazardous substances, petroleum products, or unidentified waste materials have been brought on or stored at the Site (nor any evidence of releases). Based on information that Ms. Straabe and Ms. Salway provided, they are unaware of any environmental conditions associated with the Site.

8. SUMMARY OF FINDINGS

We have performed a Phase I ESA, in general conformance with the scope and limitations of ASTM E 1527-13, on the approximate one-mile-long alignment of a proposed walking trail that will extend from La Cienega Boulevard on the east to the parking lot for the Baldwin Hills Scenic overlook to the west in Culver City, California. The Site currently consists of a portion of an adjacent active oil field and vacant land. The Phase I ESA was requested by the Client to provide information regarding the potential for existing hazardous substances or petroleum product impacts at the Site.

Based on the results of this Phase I ESA, the following table presents a summary of findings and opinions associated with the Phase I ESA performed for the Site, including known or suspect RECs, historical RECs, controlled RECs, and de minimis environmental conditions. Detailed information regarding the recommended actions identified in the table is presented in Section 9.

Assessment Category	Observed (Y/N)	REC (Y/N)	Recommended Actions
Hazardous Substances/Petroleum Products	N	N	NFA
Hazardous Wastes	N	N	NFA
Non-Hazardous Wastes	N	N	NFA
Aboveground/Underground Storage Tanks	N	N	NFA
Unidentified Substance Containers	N	N	NFA
Equipment Potentially Containing PCBs	N	N	NFA
Wastewater Systems	N	N	NFA
Evidence of Releases	N	N	NFA
Pools of Liquid, Pits, Ponds, Lagoons	N	N	NFA
Wells	N	N	NFA
Other Site Issues	N	N	NFA
Adjacent Properties	N	N	NFA
Historical Land Use – Site	Y	N	NFA
Historical Land Use – Adjacent Properties	Y	N	NFA
Recommended Action:			
AA = Additional action recommended.			
NFA = No further action required at this time.			
DM = De minimis condition where additional activities do not appear warranted at this time.			

The eastern portion of the Site is located within an oil field that has been active since 1924. No oil wells or staining were observed on the Site. According to DOGGR maps, eight plugged oil wells are located adjacent or near the Site. These plugged oil wells, as well as the historic use of a portion of the Site as an oil field, represent an environmental concern for the Site due to the potential of past releases.

9. CONCLUSIONS AND RECOMMENDATIONS

We have performed a Phase I ESA, in general conformance with the scope and limitations of ASTM E 1527-13 of the Site. Exceptions to, or deletions from, this practice are described in Section 1.4 of this report.

No RECs were noted on the Site. However, the previous use of the eastern portion of the Site as an active oil field since 1924 is considered an environmental concern for the Site. At the request of the Client, a Limited Phase II ESA was performed concurrently with the Phase I ESA. The County of Los Angeles created the scope of work for the Limited Phase II ESA for Geocon to perform. The Limited Phase II ESA report will be provided under separate cover.

Any undocumented subsurface structures encountered during site development activities including septic tanks, underground storage tanks, wells, etc. should be properly removed in accordance with regulatory permit requirements.

11. QUALIFICATIONS

This Phase I ESA report was prepared by Mr. Scott Nunes and reviewed by Mr. Jim Brake. We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR Part 312. We have the specific qualifications based on education, training, and experience, to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Mr. Brake has an MS degree in Geological Science and 28 years of experience in environmental investigation and remediation, including implementation of Remedial Investigation/Feasibility Study programs and soil and groundwater remedial actions for private industrial and government clients. He has managed a wide variety of projects for clients in the manufacturing, transportation, mining, automobile and real estate industries including Environmental Protection Agency and DTSC Superfund sites. Mr. Brake has extensive experience in the performance of Phase I and II ESAs of commercial, industrial, and agricultural properties throughout California.

Mr. Nunes is a Senior Environmental Scientist for Geocon. He has over 27 years conducting and managing environmental investigations. Mr. Nunes has completed numerous Phase I and II ESAs, Preliminary Endangerment Assessments, underground storage tank removals, and asbestos and lead-based paint survey and abatement activities for a variety of residential, commercial, school, hospital, industrial, agricultural, and municipal properties. He has a Bachelor's of Arts in Geography-Ecosystems (Environmental Science) and is a Certified Asbestos Consultant (CAC) in California.

APPENDIX

A

PHASE I INTERVIEW QUESTIONNAIRE

The purpose of this questionnaire is to obtain information from knowledgeable individuals regarding the site. This questionnaire will become part of the Phase I ESA report.

A. SITE INFORMATION

Project Number: A9240-77-01 Site Name/Reference: Park to Playa Trail - Segment C (Blair Hills)

Site Location: Culver City, CA

B. INTERVIEW INFORMATION

Date/Time: _____ In Person
Interviewer: _____ By Telephone, Number: _____
Person Interviewed: Ana Straabe & Candace Salway By Facsimile, Number: _____
Title/Company: Deputy Chief of Urban Proj. By E-mail, address: ana.straabe@mrca.ca.gov
Mountains Recreation and Conservation Authority

and; Freeport McMoRan Oil and Gas – Candace_Salway@fmi.com

1. What is your relationship to the site? Project Manager for the future regional trail that will be routed through the site. Working with the property owner Baldwin Hills Regional Conservation Authority to implement the project on the subject property.

Candace is works for Freeport McMoRan Oil and Gas (FMO&G) – the subsurface leasee of the property.

2. Do you have good knowledge regarding the uses and physical characteristics of the site?
 Yes
 No If not, who does? Greg Maher (Alta) and Candace Salway (FMO&G)
Phone Number: 213.489.7443 // 323.298.2266

3. Do you have good knowledge regarding the activities/processes conducted at the site?
 Yes
 No If not, who does? Candace Salway (FMO&G) or County Counsel – Claudia Gutierrez

Phone Number: 323.298.2266 (Candace) // 213.974.8118 (Claudia)

C. PROPERTY INFORMATION

1. To the best of your knowledge, what are the current and past uses of the site? Please describe with approximate dates.

Oil drilling has historically occurred on-site and directly adjacent to it.

2. To the best of your knowledge, what are the current and past uses of the adjoining properties?

Oil drilling activities to the south. Residential property to the north. Former school to the north west – but currently a vacant lot being converted into a natural park.

3. To the best of your knowledge, what are the current and past uses in the surrounding area?

See above. Also, to the east (across La Cienega Blvd.) Kenneth Hahn State Recreation Area (KHSRA)

PHASE I INTERVIEW QUESTIONNAIRE

Page 2 of 6

exists. To the far west end (sharing a property boundary), Baldwin Hills Scenic Overlook (BHSO).

4. Are there currently, or have there been in the past, any surface water bodies such as creeks or streams or other surface drainage on or adjacent to the site?
No bodies of water, but there is a permitted RWQCB stormwater discharge point onsite.
5. Any historical or current pools of liquid noted? Source? Location? Describe.
No pools of liquid other than the permitted RWQCB stormwater discharge point onsite.
6. Any historical or current standing water noted? Source? Location? Describe.
No standing water other than the permitted RWQCB stormwater discharge point onsite.
7. Are there any waste water discharges (including storm water) to a drain, ditch, or stream on the site and/or on adjacent properties:
Yes there is a permitted RWQCB stormwater discharge point onsite.
8. Are there currently, or have there been in the past, any wells (e.g. water, oil, gas, irrigation, injection, abandoned), pits, clarifiers, cisterns, cesspools, or similar receptacles noted where liquids drain, collect or are stored (sumps) that are likely to contain hazardous substances or petroleum products on the site or adjacent properties?
Yes; former and current oil and gas wells, and active production injection and fresh water lines on site and at adjacent properties.
9. Identify the source of potable water on the site.
No potable water onsite. Municipal water is non-potable fresh water used for dust control.
10. Identify the sewage disposal system on the site (type and age).
None.
11. Is there any historical or current solid waste disposal on site? Describe.
None.
12. Is there any historical or current unnatural fill or grading, particularly fill of unknown origin? Describe.
None.
13. Is there any historical or currently stained soil or pavement? Describe.
None. However environmental testing was performed as part of Phase 2 environmental report.
14. Is there any historical or current stressed vegetation noted (other than caused by drought)? Describe.
None. However biological observation was performed as part of Phase 2 environmental report.
15. To your knowledge, are there or have there been:

Hazardous substances on the site?

Yes No

PHASE I INTERVIEW QUESTIONNAIRE

Petroleum products on the site?

Yes No

If current uses involve hazardous substances or petroleum products, please identify the type, quantity and storage conditions of those substances.

Hazardous Substance or Petroleum Products	Location	Quantity	Storage Conditions
Chemicals associated with down-hole closed loop oil well systems	At current producing well sites		Secondary containment
Petroleum that is produced from multiple wells	At current producing well sites		Secondary containment

If hazardous or otherwise controlled waste storage areas are present on the site, please identify the type, location, quantity, and storage conditions of the waste materials.

Material Stored	Location	Quantity	Storage Conditions
Not stored on-site (trucked in)			
No petroleum stored on-site			

16. If hazardous substances and/or petroleum products are present, are there indications of any of the following:

An existing release?

Yes No

A past release?

Yes No

A threat of their release?

Yes No

If yes to any of the above, please describe: n/a

17. Are there any aboveground or underground storage tanks? Identify tank volume, location, material, age.

AST/UST and Age	Location	Tank Volume	Material stored
None			

PHASE I INTERVIEW QUESTIONNAIRE

--	--	--	--

18. Are there any historical or current drums and/or other containers? Identify volume, material, and location.

Volume	Material	Location
Varies	Corrosion inhibitors; Supplied to CUPA	At current well sites

19. Have there been any historical or any current noxious odors noted on the Site? Source? Describe.

None.

20. To your knowledge, are there any utility corridors on the Site? Describe.

In-field pipelines to transport petroleum products (above ground and below ground) and gasoline pipeline from Chevron. Above ground electrical and low-voltage.

21. Any electrical or hydraulic equipment likely to contain PCB's such as transformers, hydraulic lifts, or elevators (fluorescent light ballast excluded).

Electrical poles containing transformers

22. Are there any occupants on the Site? Describe and list duration of occupancy.

No one resides on-site, however FMO&G is an oil field operator that leases the property.

PHASE I INTERVIEW QUESTIONNAIRE

23. Are there structures present on the site? Provide a general description of the structures on the site (amount, size, and age)?

Structure	Sq. Footage	Age
None.		

24. If any structures identify the type of HVAC system and fuel source on the interior. Any boilers present?

None.

25. Is the facility equipped with any backup generators? Fuel source?

None.

26. Any historical or current stains or corrosion on floors, walls or ceilings?

None.

27. Do you have good knowledge regarding the identity of any existing documents relating to the Site?

Yes

No If not, who does? FMO&G – Candace Salway__ Phone Number: 323-298-2266

28. To your knowledge, do any of the following documents exist with respect to the Site? If yes, please name the document and comment upon whether it is available for review.

Document	Availability/ Source	Title of Document
Environmental site assessment reports?	Geocon	
Environmental audit reports?	N/A	
Environmental permits?	FMO&G	Stormwater discharge; CUPA; AQMD
Storage Tank registrations?	N/A	
Underground Injection System registrations?	FMO&G	
Material safety data sheets (MSDS)?	FMO&G	
Community right-to-know plans?	FMO&G	
Safety plans?	FMO&G	
Spill Prevention, Countermeasure, & Control Plans?	FMO&G	

PHASE I INTERVIEW QUESTIONNAIRE

Document	Availability/ Source	Title of Document
Illness and Injury Prevention Plans?	FMO&G	
Reports regarding hydrogeologic conditions on the site or surrounding area?	FMO&G	
Hazardous waste generator notices or reports?	FMO&G	
Geotechnical studies?	LA County DPW/GPI	
Risk assessments?	FMO&G	
Recorded Activity and Use Limitations (AULs)?	FMO&G	

To your knowledge, do any of the following exist with respect to the Site?

29. Notices or other correspondence from any government agency relating to past or current violations of environmental laws? Yes No

If yes, describe: _____

30. Notices or other correspondence from any government agency relating to environmental liens encumbering the Site? Yes No

If yes, describe: _____

31. Pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances, or petroleum products in, on, or from the Site? Yes No

If yes, describe: _____

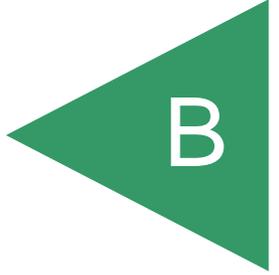

32. Notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products? Yes No

If yes, describe: _____

33. Please provide any additional information relative to this project.

Current active oil and gas production facility in operation since 1924. No other uses to our knowledge have occurred on-site. BHRCA acquired the property in 2001 and has limited prior history.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/09/2014 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 03/11/2015 has revealed that there are 9 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, and dated 02/16/2015 has revealed that there are 7 SWF/LF sites within approximately 0.5 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Industrial, Agricultural or Solid Waste (Class I, II or III)
 Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
 NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
 Subregion: 4
 Facility Telephone: Not reported
 Facility Contact: Not reported
 Agency Name: SPRAYLAT CORP
 Agency Address: Not reported
 Agency City,St,Zip: 0
 Agency Contact: Not reported
 Agency Telephone: Not reported
 Agency Type: Private
 SIC Code: 2851
 SIC Code 2: Not reported
 Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
 Primary Waste: STORMS
 Waste Type2: Not reported
 Waste2: Stormwater Runoff
 Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
 Secondary Waste: Not reported
 Secondary Waste Type: Not reported
 Design Flow: 0
 Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/16/2014	Source: EPA
Date Data Arrived at EDR: 01/08/2015	Telephone: N/A
Date Made Active in Reports: 02/09/2015	Last EDR Contact: 01/08/2015
Number of Days to Update: 32	Next Scheduled EDR Contact: 04/20/2015
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/16/2014	Source: EPA

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810

	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/09/2014

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/09/2014
Date Data Arrived at EDR: 12/29/2014

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/09/2014

Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 09/18/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/19/2014	Telephone: 703-603-0695
Date Made Active in Reports: 10/20/2014	Last EDR Contact: 02/26/2015
Number of Days to Update: 31	Next Scheduled EDR Contact: 06/15/2015
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 09/18/2014	Source: Environmental Protection Agency

State- and tribal - equivalent NPL

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 03/11/2015	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 03/12/2015	Telephone: 916-323-3400
Date Made Active in Reports: 03/18/2015	Last EDR Contact: 03/12/2015
Number of Days to Update: 6	Next Scheduled EDR Contact: 05/18/2015
	Data Release Frequency: Quarterly

State- and tribal - equivalent CERCLIS

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 03/11/2015	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 03/12/2015	Telephone: 916-323-3400

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 11/10/2014	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 12/01/2014	Telephone: 202-307-1000

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104
Date Made Active in Reports: 08/07/1995	Last EDR Contact: 06/02/2008
Number of Days to Update: 35	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: No Update Planned

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

	Data Release Frequency: Varies

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013	Source: Environmental Protection Agency

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

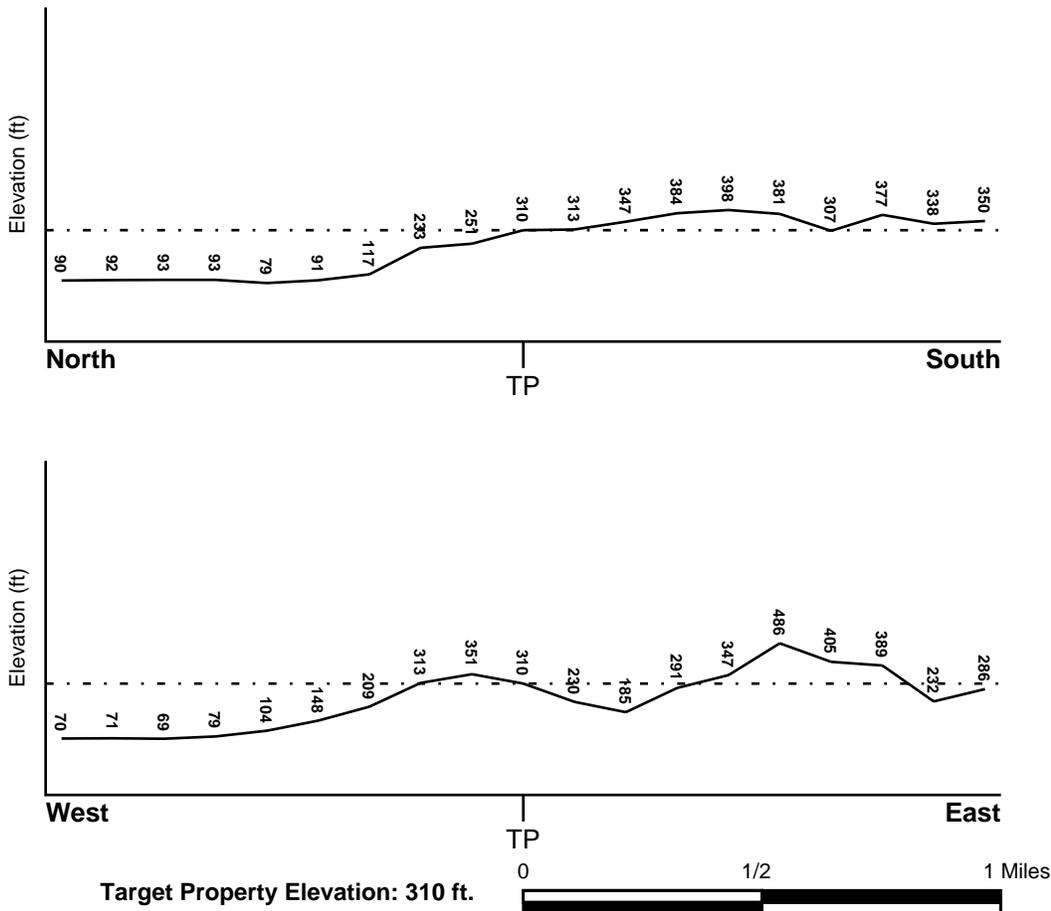

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u>	FEMA Flood
LOS ANGELES, CA	<u>Electronic Data</u>
	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06037C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	NWI Electronic
BEVERLY HILLS	<u>Data Coverage</u>
	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile NNW
Site Name:	KENNETH HAHN STATE RECREATION AREA
Site EPA ID Number:	CAD983673286
Groundwater Flow Direction:	NOT AVAILABLE.
Inferred Depth to Water:	likely to exceed 500 feet.
Hydraulic Connection:	The site is located in the Baldwin Hills, which form a barrier to ground water flow and are considered non-water-bearing.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Quaternary
Code: Q (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: sandy loam
 gravelly - sandy loam
 silt loam
 clay
 fine sand
 gravelly - sand
 sand
 fine sandy loam

Surficial Soil Types: sandy loam
 gravelly - sandy loam
 silt loam
 clay
 fine sand
 gravelly - sand
 sand
 fine sandy loam

Shallow Soil Types: fine sandy loam
 gravelly - loam
 sandy clay
 sandy clay loam
 clay
 silty clay
 sand

Deeper Soil Types: gravelly - sandy loam
 sandy loam
 very gravelly - sandy loam
 stratified
 very fine sandy loam
 weathered bedrock
 sand
 gravelly - fine sandy loam
 silty clay loam
 clay loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

RADON

State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

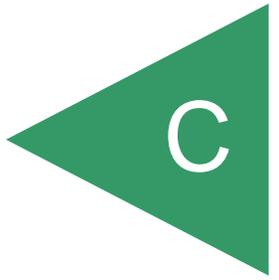

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.
